# SHOE -COLLECTION 2019 -THE TECHNOLOGIES

With the right badminton shoes, you can prevent injuries and perform better on court. Put simply, badminton shoes have to be comfortable, improve your game and prevent injuries. These three factors are the basics in all FZ FORZA shoes.

A lot of people focus on the racket when buying badminton equipment, but shoes, and the right shoes, are at least as important as the racket. A pair of good shoes is essential to perform. Badminton is an extremely fast-paced game that requires a lot of movement in different directions. You move back and forth, from side to side and jump. The game requires quick changes in pace and direction, and the quick footwork is essential in badminton. Any slip hurts your performance or even worse, your body!

The FZ FORZA shoes are made in materials quality checked in rigorous test to make sure that it is suitable and stable. Before the shoes enter the market they are furthermore tested by professional badminton players and if necessary, improvements are made before you find it on the shelves.

## LAT

The lateral stability technology enhances the durability of the shoe and the lateral stability of the forefoot during intense and rapid transfer of direction. Lateral stability is important in a badminton shoe when moving quickly around on court from side to side.

## DURA-COAT

Our High-tech microfiber PU treated with a thin coating. The combination of Dura-coat gives the shoe an extreme durability and a unique abrasion resistance. Dura-coat is applied on areas where the shoe is most exposed for abrasion.

## X-TECH

The ankle is exposed for twisting in the many sideways motions in badminton. A twist in the ankle is one of the most common injuries in badminton, but with the evolutionary FZ FORZA X-Technology the stability of the ankle is increased which prevent/reduce the twisting of the ankle.

## DRYLEX

Consists of special mesh layer and holes in the shoe that provides excellent breathability for the feet. Drylex helps transporting moisture away from your feet to keep them dry and comfortable.

# AN EASY GUIDE THROUGH THE FZ FORZA TECHNOLOGIES, AND WHAT THIS MEANS TO YOU ON THE COURT

## FZORB

FZorb is a fantastic material for shock absorption. By molding the FZorb into the heel-area of the sole, decreases the many hard shocks that player's feet are exposed to during the game, as well as providing increased comfort for the player.

+ Is FZorb molded into the forefoot area of the sole, to provide an greater shock absorption, particularly when during jumps and sidesteps. In addition, FZorb+ enhanced the comfort compared to FZorb.

++ For a larger shock absorption is FZorb++ the right choice. These shoes are provided with a hole under the heel, making room for an increased deformation of the material which increases the shock absorption.

## F-ZONE

Our FZone Grip ensures excellent grip with the court which supports the slip resistance. FZone Grip consists of various patterns that support variety of movements in badminton, so the grip on the court is optimal in all game situations. We only use rubber of the highest quality to our soles to ensure an extremely wear resistant outsole.

## ASE

By inserting this light weight TPU piece under the arch creates both a lighter and stronger shoe but also more stable. ASE supports the arch and helps prevent pronation and torsion in the shoe for increased functionality and comfort.

+ By extending the ASE, the FZClaw appears on the lateral side of the forefoot. FZClaw significantly enhances the lateral stability of the foot and provides the shoe extra durability during intense and rapid transfer of direction.

## TUCK BOARD

With our Tuck Board increases the shoe's torsional flexibility. Torsional flexibility supports the foot's natural movement and allows the foot to move faster. Our Carbon Tuck Board is made of three-dimensional carbon fiber sheets that support the torsional movement and reduce stress on the arch tendon.
